

Patrick Diehl

Résumé

Research Interests

- Peridynamics
 - Mathematical Materials Science for Peridynamics.
 - Quantitative analysis of Peridynamics with experimental data or elasticity theory.
- High Performance Computing
 - Coupling CPUs and GPUs to run large simulations on hybrid cluster architectures.
 - Optimized parallel numerical libraries.

Education

2012 **Diploma in Computer Science**, *University of Stuttgart*, Germany.

Professional Experience

- 2012–2013 **Research Assistant**, *Institute for Simulation of large Systems, IPVS*, University of Stuttgart.
- 2013–present **Research Assistant**, *Institute for Numerical Simulation*, University of Bonn.

Visiting positions

2015 **Guest Research Assistant**, *Center for Computation and Technology*, Louisiana State University.

Certificates

Baden–Württemberg Certificate
Certificate for successful completion of the program in higher education pedagogy by the center for educational development of the state of Baden–Württemberg.

Publications

Journal articles
